www.durfold.com

Better for Infection Control

- Designed for less surface area and minimum upholstered components to clean
- From seat deck and below, use of powder coated steel to withstand harsh cleaners
- No cavities or concealed storage areas that are susceptible to debris and litter and many times skipped during cleaning
- Open structure from seat to floor allows for easy cleaning of floor surface
- Clean out gap provided between back panel and seat deck for ease of cleaning debris from surfaces

Better for Engineering

- No sleeper mechanism or activators that can be broken or misused and damaged by user
- Simple bolted connections for easy maintenance and replacement
- No need for casters so furniture and surrounding surfaces are not exposed to nicks and cuts and flooring is not at risk of marring from wheels
- No use of finished wood that could be susceptible to abuse and damage and harsh chemicals
- The lightest full-size sofa in our offering, the Hover + flip without arms, weighs only 120 lbs.
- Designed so that both sides of seat cushion can be utilized resulting in less replacement and longer life cycle

Better for Patient Safety

- No mechanisms or locks needed to convert means that the risk of user misoperation or incompleting tasks to convert furniture is greatly minimized
- Design allows user to place feet directly underneath their body to give added stability while sitting or standing

Better for Staff and User

- Very intuitive use results in less staff time training users in how to convert appropriately
- Available in armed and armless designs to accommodate room alcoves and specific design needs
- Back cushions are tethered to sofa with snap fasteners.
- Open, airy and fresh design compliments spaciousness in smaller rooms better than traditional boxed style furniture
- Exceptional 9" thick, two-piece mattress for sleeping as opposed to 2" thick mats upholstered to panel frames of mechanisms
